

ONLINE COURSE DEVELOPMENT & LEARNING PLATFORM IMPLEMENTATION

Partnered with a Montessori education provider to develop and implement a comprehensive online caregiver training program consisting of 12 structured learning modules.

The project involved transforming educational content into a well-organized digital learning experience by designing the curriculum structure, coordinating multimedia production, organizing lessons and resources, creating branded thumbnails, and implementing the course within Teachable.

The result was a scalable online learning platform that provided caregivers with a clear and engaging learning journey.

PLEASE NOTE: The person in this image is not the actual client. This is a presentation for portfolio purposes only. Clients identity is kept private for confidentiality.

PROJECT OBJECTIVE

Create a structured online learning experience that would enable caregivers to access professional Montessori training through an organized, easy-to-navigate digital platform while providing the client with a scalable system for delivering educational content.

MY ROLE

LEARNING EXPERIENCE & PLATFORM IMPLEMENTATION CONSULTANT

RESPONSIBILITIES INCLUDED:

- Learning experience design
- Curriculum organization
- Course architecture
- Lesson sequencing
- Teachable implementation
- Learning asset organization
- Thumbnail design
- Multimedia production coordination
- Course content ideation
- Quality assurance before publishing

SCOPE OF WORK

Learning Experience Design

- Organized a 12-module curriculum into a logical learning progression
 - Structured lessons for improved comprehension and navigation

Curriculum Architecture

Designed and organized a comprehensive 12-module curriculum within Teachable, creating a structured learning path that guided caregivers through progressive topics while maintaining consistency across the entire program.

Learner Experience

Configured the learner-facing course environment to provide intuitive navigation between modules, multimedia lessons, downloadable resources, and supporting materials, making it easy for students to progress through the program.

Lesson & Resource Organization

Structured each module with a consistent lesson format that combined video instruction, PDFs, learning resources, and interactive activities, creating a cohesive and easy-to-follow educational experience.

BUSINESS VALUE

Enabled the client to transform their in-person educational expertise into a scalable online training program by creating a structured digital learning environment that supports both student engagement and long-term content management.
